

AnneHearnden

Heart for Knitted Knockers

Use all 6 strands of embroidery thread. Separate them one at a time, the threads will then lay flat instead of twisted and will cover the stitch better. Use a blunt needle to avoid splitting any threads or yarn

CH

Materials

Blunt needle

6 stranded embroidery thread
approximately 32-35 inches (80-90cm) will complete one heart

Use a waste knot, or just leave your thread resting on top of your work away from the starting point.

Weave your ends in when you have finished, leave a very short tail inside to avoid the end popping through to the right side.
